	Surveyor: 13812 This Statement of Deficiencies was generated as a result of complaint investigation conducted in your facility on 11/12/09 and finalized on 11/13/09, in accordance with Nevada Administrative Code, Chapter 449, Facilities for Skilled Nursing. Complaint #NV00023190 was substantiated with deficiencies cited. (See Tag Z230) A Plan of Correction (POC) must be submitted. The POC must relate to the care of all patients and prevent such occurrences in the future. The intended completion dates and the mechanism(s) established to assure ongoing compliance must be included.							
	Monitoring visits may be imposed to ensure on-going compliance with regulatory requirements.

BUILDING B. WING NVN4202SNF 11/13/2009 STREET ADDRESS, CITY, STATE, ZIP CODE NAME OF PROVIDER OR SUPPLIER 550 NORTH SHERMAN ROAD **HIGHLAND MANOR OF FALLON FALLON, NV 89406** SUMMARY STATEMENT OF DEFICIENCIES PROVIDER'S PLAN OF CORRECTION (X4) ID ID (X5) COMPLETE (EACH DEFICIENCY MUST BE PRECEDED BY FULL (EACH CORRECTIVE ACTION SHOULD BE PREFIX **PREFIX** DATE REGULATORY OR LSC IDENTIFYING INFORMATION) CROSS-REFERENCED TO THE APPROPRIATE TAG TAG DEFICIENCY) Z291 Z291 Continued From page 1 failed to ensure one resident consumed adequate fluids to prevent dehydration resulting in hospitalization. (Resident #2) Findings include: Resident #2 was admitted to the facility with diagnoses including dementia, chronic urinary tract infections, hallucinations, and renal disease. On 9/12/09 at 6:02 AM, the nursing notes indicated Resident #2 was lethargic and dehydrated with shortness of breath. The nurse who had written the note indicated the resident had a dry mouth and the urine was dark yellow. The resident was on three antibiotics for a urinary tract infection. At 7:00 AM the nursing notes indicated the resident was lethargic with rapid respirations. The physician was notified and the resident was sent to the ER for evaluation. A review of the hospital record revealed Resident #2 was dehydrated with hypernatremia. Lab values were sodium 175 (normal range 135-145), HGB 15.8 (normal range 12-16), HCT 49.3 (normal range 35-48), BUN 114 (normal range 8-25), creatinine 3.0 (normal range 0.4-1.4), urine specific gravity greater than 1.030 (normal range 1.006-1.030), WBC 22,000 (normal range 5000-12,000). The hospital record indicated the laboratory values were lowered significantly after IV hydration of the resident. A review of the fluid intake sheets for September of 2009 from the facility indicated Resident #2 consumed anywhere from 1760 CC's to 2640 CC's of fluid per day from 9/1/09 until 9/12/09. The facility staff only reports estimated

An interview with the food service manager revealed that each resident is provided with a minimum of 880 CC's of fluid with each meal. The facility administrator indicated that fluid intake and output are only done on new admissions unless there is a physician's order. There was no evidence the facility staff was closely monitoring Resident #2 for adequate fluid intake even though the resident had a urinary tract infection and was on antibiotic therapy. Severity: 3 Scope: 1
